

Support the BCC Federation in achieving its goals through **efficient, user-friendly** and **secure** IT solutions!

## Fullstack Software Engineer

We are looking for software engineers with an aptitude for understanding complex processes and experience in building, running and supporting cloud-based applications

### Typical Tasks

- Software **architecture**
- Implementation of **cloud-based applications** and mobile apps
- Development and maintenance of shared **application platform**
- Initiatives to improve **security, performance** and **reliability**
- **Collaboration** with and assisting other developers, volunteers and stakeholders

### Required Skills (at least 3)

- **Several years' experience** with software development and preferably tertiary education
- Cloud native and **cloud services** (e.g. Azure, GCP, AWS)
- Docker, **distributed systems** and/or microservices
- **Cybersecurity** / web application security
- C# .NET
- GO
- HTML/CSS
- JavaScript/Typescript/NodeJS
- **Infrastructure** as Code / Terraform

### Your Personal Qualities

- Ability to **learn** and acquire knowledge quickly
- Structured, precise, and keen to **deliver quality**
- **Self-motivated** and engaged with high work capacity
- Ability to comprehend **complex business processes** and systems
- **Flexible, service minded** and good at collaborating with others
- English and Norwegian **language skills** an advantage

### What We Can Offer

- **Inspirational** work environment
- Varied, **challenging** and exciting projects
- Possibility for personal and **professional development**
- **Competitive salary** / compensation

### Location

- Ideally at the main office of the BCC Federation in Moss, Norway
- Skilled applications from abroad are also encouraged to apply – hybrid/remote positions will be considered.
